Delete Data

S4FN SAF-T Solution Components

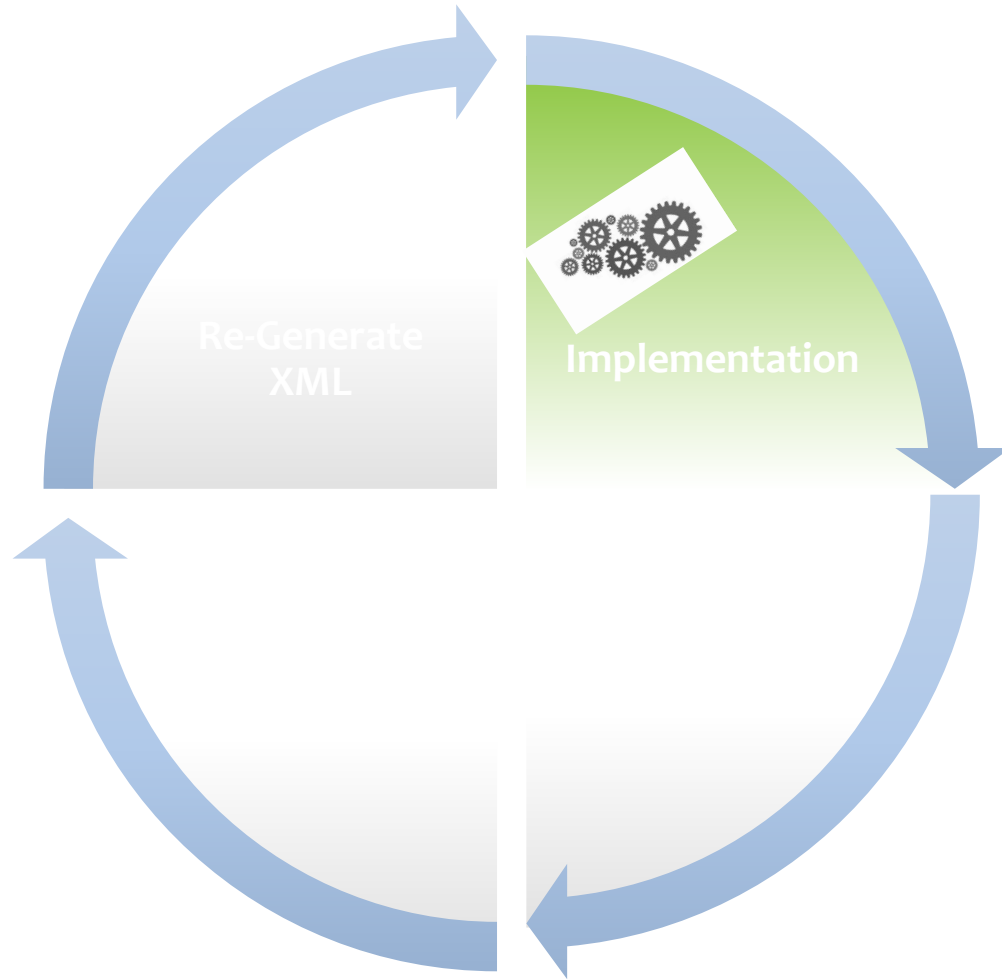

- You can manage generated XML structures
- You can display, send, delete, download files.
- If you have some errors on XML related with customization, after correcting customization you can re-generate xml without extracting huge data
- This is an important point when you have limited time schedule.

The screenshot displays the S4FN SAF-T Cockpit interface. The main window shows a table of documents with columns for UUID, CoCode, Year, and Change. A pop-up window titled 'Display XML document' is open, showing the XML structure for a selected document. The XML is an AuditFile with a header and a company address section.

```
<?xml version="1.0" encoding="UTF-8"?>
<n1:AuditFile xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns:n1="urn:StandardAuditFile-Taxation-Financial:NO">
  <n1:Header>
    <n1:AuditFileVersion>1.0</n1:AuditFileVersion>
    <n1:AuditFileCountry>NO</n1:AuditFileCountry>
    <n1:AuditFileDateCreated>2017-03-20</n1:AuditFileDateCreated>
    <n1:SoftwareCompanyName>S4FN</n1:SoftwareCompanyName>
    <n1:SoftwareID>S4FN SAF-T-NO ADDON</n1:SoftwareID>
    <n1:SoftwareVersion>1.0</n1:SoftwareVersion>
  </n1:Header>
  <n1:Company>
    <n1:RegistrationNumber>123456NO</n1:RegistrationNumber>
    <n1:Name>S4FN AS</n1:Name>
    <n1:Address>
      <n1:StreetName>Veien</n1:StreetName>
      <n1:Number>1</n1:Number>
